

V TYPE DSL SYSTEM

V type single pole conductor system is a DSL system which can accommodate large cross section of conductors we can give 92sq mm to 200sqmm of copper conductor for wide range of heavy duty applications.

These systems are specially recommended for rough handling and high current applications special high temperature insulation can be given. This can withstand up to 100degree centigrade,

V type Insulated conductor rails for the range from 60 to 1000 A. The rails are suitable for supplying power for a wide range of applications, e.g., multiple cranes in one bay heavy capacity cranes, transport installations with several lifting and conveying devices, amusement rides, Coal/coke pusher cars and many more
